Phone: 787-509-7430 | Email: leandrocitygear@icloud.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Software Engineer with experience developing web and desktop applications, designing relational databases, and building data-driven solutions. Skilled in software development, database management, data validation, and quality assurance, with experience supporting data visualization and web-based imagery applications in collaborative engineering environments. Strong analytical and problem-solving abilities with a focus on developing reliable, efficient, and user-centered solutions. Excellent communication, time management, adaptability, and teamwork skills, with the ability to quickly learn new technologies and effectively manage multiple priorities in fast-paced environments. Proficient in Microsoft Office (Word, Excel, PowerPoint). Fully bilingual in English and Spanish.

EXPERIENCE

Freelance Software Engineer | San Juan, PR

June 2026 – Present

- Develop full-stack applications using React, Angular, JavaScript, TypeScript, Python, Node.js, Express, SQLite and PostgreSQL, implementing secure authentication, CRUD operations, and RESTful APIs.
- Deploy and maintain production applications using Netlify, Neon and Render, configuring cloud-hosted databases, environment variables, and CI/CD workflows.
- Collaborate with clients to gather requirements, translate business needs into technical solutions, debug complex frontend and backend issues, and deliver scalable, maintainable software following modern software engineering best practices.
- Debug and optimize frontend and backend applications by improving performance, fixing state management issues, resolving API errors, and enhancing application reliability across desktop and mobile devices.

Vantor | Associate Imagery Technician | San Juan, PR

October 2024 – June 2026

- Supported engineering teams by optimizing data visualization and web based imagery workflows, improving processing efficiency and system performance.
- Enhanced image labeling tools and internal web applications to improve usability, streamline workflows, and support operational efficiency.
- Validated, managed, and maintained large datasets to ensure data accuracy, integrity, and consistency across multiple projects.
- Performed quality assurance activities by identifying, investigating, and resolving data discrepancies to maintain reliable imagery analysis.
- Collaborated with cross-functional teams to support process improvements, optimize data workflows, and ensure the timely delivery of high quality imagery products.

EDUCATION

Bachelor Degree in Communications and Media Studies; Universidad del Sagrado Corazón, San Juan, PR

CERTIFICATIONS / TRAININGS

- Front-End Engineering Certification; CodeCademy
- Back-End Engineering Certification; CodeCademy
- Full-Stack Engineering Certification; CodeCademy

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript, Python, SQL, HTML, CSS
- **Libraries & Frameworks:** Angular, React, Redux, Node.js, Express.js, Electron.js, Tailwind CSS,
- **Databases:** PostgreSQL, SQLite
- **Developer Tools:** Git, GitHub, VS Code, Vite, Netlify, QGIS, Render, Neon, Postman
